

Tree Trimming and Debris Removal

Tree trimming and debris removal during service restoration:

The Wallingford Electric Division will cut and/or remove trees and limbs from power lines but is not responsible for the removal of this debris.

The Wallingford Electric Division does not remove trees and branches and other debris as a result of storm restoration. If the tree belonged to the town, then Public Works will remove the debris. If the tree was on private property, the property owner is responsible for the debris removal.

The Wallingford Electric Division is responsible for removing tree limbs from the electric wires but not for removal from telephone or cable TV wires. The customer must call the appropriate service provider to have trees cleared from these other service wires.
