Roofing, Siding & Windows Affidavit For All Commercial Properties 3-Family & Above

Dear Applicant:

While performing roofing and siding construction on 3-family and above (including all commercial) properties you must use extreme caution not to create a temporary or permanent life-safety violation during construction. These are listed below, however, not limited to:

1. Blocking any egress and discharge paths including doors and windows.
2. Blocking any Fire/EMS apparatus access in case of an emergency.
3. Blocking FDC/standpipe (fire department connections).
4. Blocking any onsite fire hydrants.
5. Blocking accessible routes including parking spaces.
6. Accumulation of building debris along the structure.
7. Etc...

If any of the items above cannot be met, please contact the Building Official and Fire Marshal's offices for additional site review and approval of alternate means.

By signing this affidavit, you hereby agree to The Town of Wallingford's Building Official and Fire Marshal's request. Thank you in advance for being safety-minded.
