Re: Power Cost Adjustment – July 2026

As required in the Electric Division's Rate No. 12, Power Cost Adjustment Clause, the Power Cost Adjustment (PCA) has been re-calculated for the six-month period beginning July 2026. **The PCA beginning with our customers' July 2026 bills will be a charge of 0.020910 per kWh for Wallingford customers and a charge of 0.023084 per kWh for Northford customers.** This represents a decrease of \$.009102 per kWh from the PCA effective through June 2026. These new PCA factors will be applied to all bills issued for the period of July 2026 through December 2026.

The Energy Conservation Fund (ECF) rate will remain at its current level of \$0.0025 per kWh.

For the average residential bill (based on usage of 750kWh), the rate change will mean a decrease of approximately 4.84%. The actual change will depend upon each customer's specific usage.

If you have any questions regarding the revised PCA, please see me or Laura.
