Wallingford, CT 06492

Inflow and Infiltration Removal Program

Inflow and infiltration (I&I) inspections are performed by Wallingford Sewer Division staff at no cost to the property owner to identify private I&I sources of clean water that may be entering the sanitary sewer system such as:

- Sump pumps,
- Exterior roof downspout connections,
- Basement floor drains, or
- Leaking sanitary sewer laterals.

The Wallingford Sewer Division has developed an Inflow and Infiltration Removal Financial Reimbursement Program to assist property owners with the cost of private inflow and infiltration removal from the sanitary sewer.

For more information please call 203-949-2672
or

Visit: www.wallingford.ct.us

Why did I receive an Inflow and Infiltration (I&I) inspection letter?

- At the time of an ownership change.
- When a building permit is issued for improvements or repairs of buildings costing \$25,000 or more.
- Potential issues were identified during a meter reading or meter replacement.

Wallingford Sewer Division

Inflow & Infiltration Removal Program
It's a community effort.

Stallone's Corner

Rainbow light experiment

Place a glass of water in direct sunlight.
Hold the white paper below the glass.

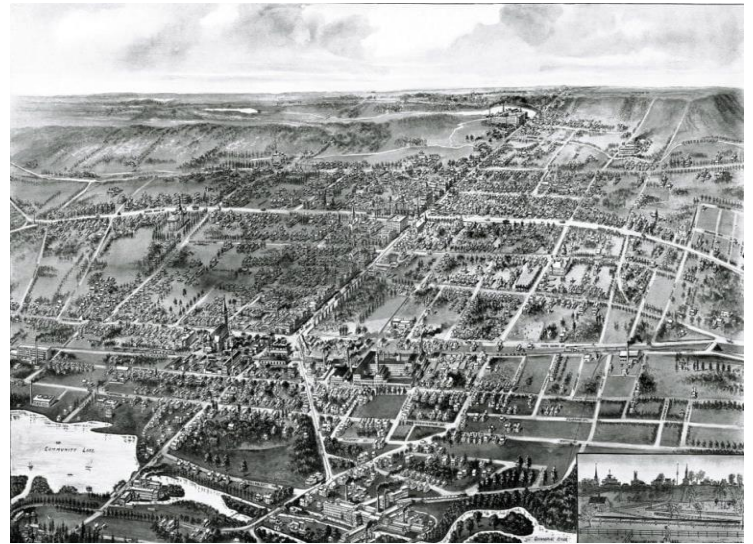

Look for the rainbow!

Historical Fact

In 1903 the Wallingford Water Works bought the water rights at Muddy River from the New Haven Water Co. The picture to the right is an aerial view of Wallingford circa 1905.

Water Conservation Tip

Shorten your shower time.

Reducing your shower by just 3 minutes can save about 8 gallons of water.

Protect your home and pipes.

Steps to Avoid Frozen Pipes

- Maintain an interior temperature of at least 55 degrees.
- Repair any broken windows and doors, and insulate walls near water meters and pipes.
- Be sure heat can circulate around meters and pipes.
- Regularly check pipe insulation for dampness. Wet insulation is worse than no insulation at all.
