

**Wallingford
Sewer Division
203-949-2678
155 John Street**

Wallingford Sewer Division

Clean water is essential to all communities, so Wallingford needs water and sewer utilities workers to meet this vital challenge. The primary responsibilities of water and sewer utilities are to maintain systems to provide potable water and convey and process wastewater.

Providing clean water and treating wastewater is a 24/7, 365 commitment that rewards each utility worker while benefiting the environment, Wallingford and neighboring communities. Every day, Wallingford Water and Sewer Divisions staff work together and share a commitment to provide potable water and treat wastewater for residents, businesses and visitors.

When you work for a water or wastewater utility you enjoy a stable career along with training and continuing education, and the satisfaction that you are directly benefiting the community and the environment.
