

FREE PRESCHOOL SCREENINGS

IDENTIFY THE SIGNS

Celebrate Better Speech & Hearing Month

Therapy for Language and Communication, in conjunction with the Wallingford Parks and Recreation and the Wallingford Health Department, is offering **FREE** speech and language screenings for children ages 3-6:11 years old. The Fluarty-2 will be administered by licensed Speech-Language Pathologists. This test contains five subtests: Articulation, Repeating Sentences, Responding to Directives and Answering Questions, Describing Actions, and Sequencing Events. It is a standardized assessment that yields scores for articulation (speech sound production), receptive language (comprehension), and expressive language (use of language.) TLC Speech CT believes strongly in giving back to the community, as well as early identification and intervention of speech and language disorders. More information is available on [ASHA's website \(click here\)](#).
