

Are you planning to install a lawn sprinkler system?

You need to know that

- ◆ Your lawn sprinkler system requires a backflow prevention device called an RPD (reduced pressure principle).
- ◆ If you are doing any underground work that involves water or sewer lines, you need a permit from the Water Division.
- ◆ This type of work includes lawn sprinkler systems.
- ◆ Your contractor may not be aware of the Town's Water and Sewer Standards.
- ◆ This permit helps us to know what demands are being made on our distribution system.
- ◆ Our one-time cost for an irrigation system permit is \$20.00.
